Data Analyst with expertise in SQL, Python, and data science, focused on improving business performance by analyzing trends and optimizing processes. Proficient in machine learning, data visualization, and ERP development, with a track record of delivering data-driven insights that drive organizational growth.

Skills

- Programming Languages: Python, SQL, PL/SQL, Dart Flutter
- Web Development: Oracle APEX, HTML
- Data Analysis: Statistical analysis, data cleaning, data transformation
- Machine Learning: Supervised, Unsupervised learning
- Data Visualization: Matplotlib, Seaborn, Plotly, Tableau, Power BI
- Databases: PostgreSQL, Firebase, Hive
- Tools: Git, Excel, Jira, MS Office

Experience

Developer Associate

Sep 2023 - Apr 2024

Maathra Technologies - Kalamassery, Kochi, Kerala

- Delivered ERP applications using Oracle APEX, contributing to a 15% increase in process efficiency for internal teams.
- Optimized SQL queries, reducing data retrieval time by 20% and improving processing speed by 25%.
- Maintained and improved database performance, leading to a 30% reduction in downtime.
- Completed Oracle APEX Cloud Developer certification, confirming advanced APEX development skills; leveraged newly acquired knowledge to optimize existing applications.

Python Intern

Jan 2023 - Feb 2023

Zoople Technologies - Cochin, Kerala, India

- Developed backend services using Django, enhancing code functionality and reducing bug-related issues by 10%.
- Collaborated with teams to implement features, improving overall project delivery by 15%.

Education

Post Graduate Diploma in Data Science

Apr 2022 - Apr 2024

Imarticus Learning Bengaluru, Karnataka, India

Bachelor Of Computer Application (BCA)

Jul 2019 - Mar 2023

University Of Calicut

MES Asmabi College, Thrissur, Kerala, India

Licenses & Certifications

- [Oracle APEX Cloud Developer Professional Exam Number: 1Z0-770](#)
- [SQL Bootcamp](#)
- [Machine Learning AI, Python](#)

Languages

- English
- Malayalam
- Tamil
- Hindi

Projects

MALE OR FEMALE FACE DETECTION USING WEBCAM

- Developed a gender detection system with CNNs, achieving 92% accuracy in real-time classification from webcam feeds.
- Preprocessed and managed 10,000+ facial images, ensuring reliable data for model training and deployment.

MARKET TREND PREDICTION SYSTEM

- Developed a market trend prediction system using machine learning algorithms, achieving 87% accuracy in predicting stock price movements.
- Analyzed historical financial data and integrated real-time market feeds, enhancing decision-making for investors.
- Implemented predictive analytics and data visualization features, resulting in a 20% improvement in investment strategy accuracy.

TUMOR DETECTION SYSTEM

- Created a tumor detection system using CNNs with 85% precision, aiding early diagnosis for medical professionals.
- Tested and validated the model with a dataset of over 5,000 medical images, reducing false positives by 12%.

MONEY MANAGMENT APP

- Built a cross-platform money management app using Flutter.
- Implemented financial tracking features, resulting in a increase in user engagement and financial literacy.

SPOTIFY CLONE

- Designed a Spotify clone with Flutter and Firebase, replicating key features.
 - Managed real-time database updates and user data management, ensuring seamless performance across devices.
-
